

Smart Technology, Made to Care

Floor

Floor Pressure Mat

Cair Floor is a large, high quality, non-slip floor pressure mat. When used in conjunction with a universal sensor like the Cair Connect, it will alert immediately when a user stands on it.

The mat, which is intentionally designed to look like a normal floor mat, is constructed using high quality materials and is very hard wearing. It can be positioned beside a bed, in front of a door, at the top of stairs, or any location where a user may be at risk.

Floor

Floor Pressure Mat

Specifications

Part Number	M115-413
Compatibility	Cair Connect and most 3rd party devices
Dimensions	L960 x W670mm
Length of Cable	3300mm
Type Of Plug	RJ12
Warranty	12 months

Information

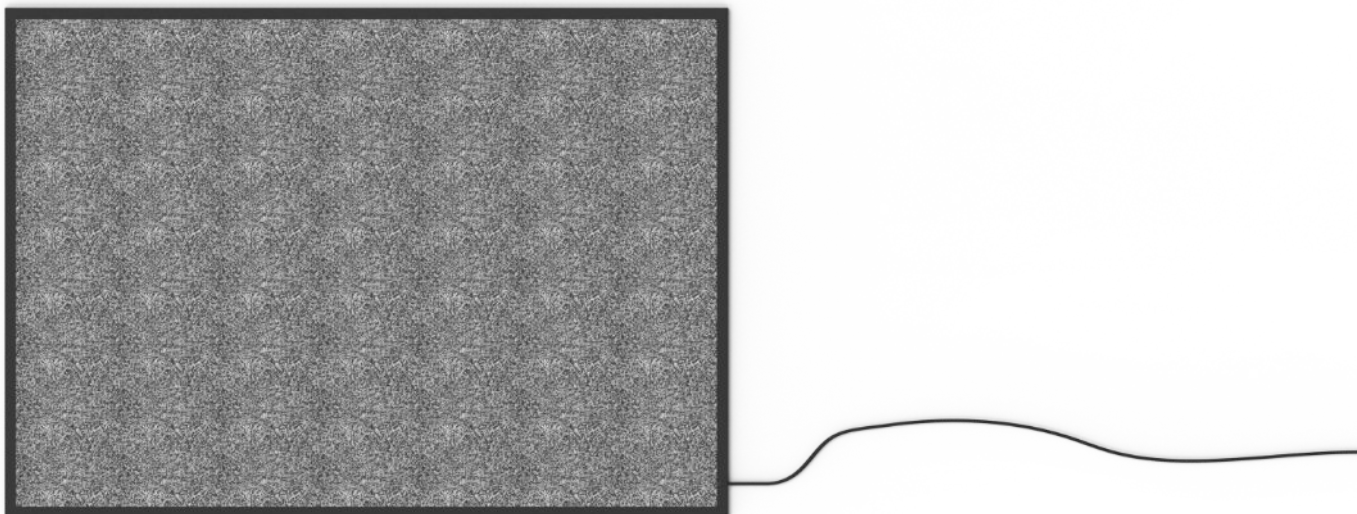

Cair Floor is a large, high quality, non-slip floor pressure mat. When used in conjunction with a universal sensor like the Cair Connect, it will alert immediately when a user stands on it.

The mat, which is intentionally designed to look like a normal floor mat, is constructed using high quality materials and is very hard wearing. It can be positioned beside a bed, in front of a door, at the top of stairs, or any location where a user may be at risk.

When testing, follow the instructions for the connected device. Periodically test the mat to ensure it is functioning correctly.

The splash proof mat can be easily cleaned using a normal vacuum cleaner. To clean the edges and underside of the mat, use disinfectant wipes or apply some antibacterial solution to a damp cloth and wipe the sensor clean, ensuring moisture doesn't enter the area where the cable enters the mat. Allow to dry naturally or wipe with a clean, dry towel. Do not immerse the mat in any solution.

The life expectancy of the mat is at least 12 months. When in storage, keep the mat flat. Do not bend the mat.
